OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Docket Nos. USTR–2026–0741, USTR-2026-0734

Notice of Determination and Request for Comments Concerning Proposed Action in the Section 301 Investigation of Acts, Policies, and Practices of Korea Relating to Structural Excess Capacity and Production in Manufacturing Sectors

AGENCY: Office of the United States Trade Representative (USTR).

ACTION: Notice of determination, request for comments, and notice of public hearing.

SUMMARY: The United States Trade Representative (Trade Representative) has determined that Korea's acts, policies, and practices relating to structural excess capacity and production in manufacturing sectors are unreasonable and burden or restrict U.S. commerce and are therefore actionable under Section 301 of the Trade Act of 1974, as amended (Trade Act). As a result of these findings, the Trade Representative proposes that appropriate action includes additional duties on all products of Korea, except as provided in this notice (Notice). USTR seeks public comment on the proposed action in the investigation and will hold a public hearing in connection with the proposal.

DATES:

January 5, 2027: To be assured of consideration, submit requests to appear at the hearings, along with a summary of the testimony, by this date.

January 5, 2027: Submit written comments by this date.

January 25, 2027: The Section 301 Committee will convene public hearings in the main hearing room of the U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, beginning at 10:00 a.m., and continuing, as appropriate.

ADDRESSES: Submit documents in response to this Notice, including written comments, rebuttal comments, and requests to appear through USTR's electronic portal: https:// comments.ustr.gov/s/. The docket number for written comments and rebuttal comments is USTR–2026–0734. The docket number for requests to appear is USTR–2026–0741.

FOR FURTHER INFORMATION CONTACT: For procedural questions concerning comments, contact the USTR Section 301 support line at (202) 395-5725. Direct all other questions regarding this Notice to Philip Butler, Deputy Assistant U.S. Trade Representative for Monitoring & Enforcement, or Nanda Srikantaiah, Assistant General Counsel, at (202) 395-5725.

SUPPLEMENTARY INFORMATION:

I. Proceedings in the Investigation

On March 11, 2026, the Trade Representative initiated an investigation of the acts, policies, and practices of Korea relating to structural excess capacity and production in manufacturing sectors, pursuant to section 302(b)(1)(A) of the Trade Act (19 U.S.C. 2412(b)(1)(A)). *See* 91 Fed Reg 12886 (March 17, 2026) (Initiation Notice). Under the same *Federal Register* notice, the Trade Representative initiated investigations of acts, policies, and practices of fifteen additional economies relating to structural excess capacity and production in manufacturing sectors.[1] The Initiation Notice solicited written comments on, *inter alia*, the acts, policies, and practices of each investigated economy relating to structural excess capacity or production in specific sectors; whether the acts,

[1] The sixteen economies are: China, the European Union, Singapore, Switzerland, Norway, Indonesia, Malaysia, Cambodia, Thailand, Korea, Vietnam, Taiwan, Bangladesh, Mexico, Japan, and India.

policies, and practices are unreasonable or discriminatory and burden or restrict U.S. commerce, and if so, the nature and level of the burden or restriction; whether the acts, policies, and practices are actionable under section 301(b), and what action, if any, should be taken; and whether there are additional considerations for assessing acts, policies, and practices that contribute to structural excess capacity and production in manufacturing sectors.

Interested persons filed over 1,070 written comments in response to the Initiation Notice, including post-hearing rebuttal comments, and pertaining to all sixteen investigated economies. In addition, USTR and the Section 301 Committee convened public hearings from May 5-8, 2026, during which nearly 140 witnesses provided testimony and responded to questions. The public submissions are available at: https://comments.ustr.gov/s/ at docket numbers USTR–2026–0067 and USTR–2026–0068. Transcripts of the hearings are available on USTR's website.

On March 11, 2026, the date the investigation was initiated, the Trade Representative requested consultations with Korea, pursuant to Section 303(a) (19 U.S.C. 2413(a)). USTR held consultations with Korea on May 27, 2026, but did not resolve U.S. concerns.

Based on information obtained during the investigation, including in confidential government-to-government consultations, public comments, testimony obtained at the public hearings, confidential advice of the appropriate advisory committees, and through the Section 301 Committee, USTR prepared a comprehensive report, *Acts, Policies, and Practices of Korea Relating to Structural Excess Capacity and Production in Manufacturing Sectors* (the Report). The Report supports a determination that certain

acts, policies, and practices of Korea that relate to structural excess capacity and production in manufacturing sectors are unreasonable and burden or restrict U.S. commerce, and are thus actionable under Section 301. The Report is incorporated by reference into this Notice, and is available on USTR's website.

II. Korea's Acts, Policies, and Practices That Create, Sustain, or Contribute to Structural Excess Capacity and Production in Manufacturing Sectors

As detailed in the Report, Korea engages in acts, policies, and practices that create, sustain, or contribute to structural excess capacity. Through these acts, policies, and practices, Korea channels activities, resources, and financing towards the maintenance and expansion of manufacturing capacity and production. The resulting capacity and production are in excess of what would result under market conditions.

Key among Korea's acts, policies, and practices are: (1) implementing industrial and sectoral plans to maintain and expand Korea's manufacturing, setting targets for the expansion of priority sectors and promoting the production and exports of national strategic industries; (2) providing preferential lending through state-owned banks that target national priority sectors and promote the growth of production and exports; (3) sustaining capacity and production despite market conditions; (4) failing to address global excess capacity and production, including by encouraging or failing to address imports from NMEs; (5) failing to address global excess capacity and production, including by encouraging or failing to address foreign direct investment from NMEs; and (6) maintaining inadequate labor protections for collective bargaining that artificially lower costs and support the expansion of manufacturing investment and production.

Korea engages in these interventions at both an economy-wide level, as well as within key manufacturing sectors, such as automotive, semiconductors, and chemicals. Taken together, Korea's acts, policies, and practices create, sustain, or contribute to structural excess capacity and production in manufacturing sectors.

III. Determination on the Acts, Policies, and Practices Under Investigation

A. Korea's Acts Policies and Practices that Create, Sustain, or Contribute to Structural Excess Capacity and Production Are Unreasonable

The acts, policies, and practices of Korea that relate to structural excess capacity and production are unreasonable within the meaning of Section 301(b) because they: target exports and export-led growth; distort fair, market-oriented competition; fail to commensurately promote domestic demand, consumption, and imports; and undermine the welfare of Korea's workers and public.

First, Korea's acts, policies, and practices are unreasonable because they target exports and export-led growth. Korea has developed industrial plans and implemented coordinated actions to enhance its manufacturing exports. For example, Korea's *First Master Plan for Developing Critical and Emerging Technologies (2024-2028)*: *A Blueprint for National S&T Sovereignty* (Master Plan) aims to achieve "national [science and technology] sovereignty" and "global leadership" in 12 critical and emerging technologies. Korea's Master Plan details Korea's vision to maintain dominance in its current exports, such as memory semiconductors and next-generation displays, while also achieving "leadership" in future technologies, such as AI chips, advanced biotechnology, and quantum. Korea also developed sector-specific strategies, such as the *K-Semiconductor Belt Strategy*, and the *Future Car Industry Development Strategy 2030*,

which supplement the Master Plan's goals and direct additional financial resources toward expanding production and boosting export competitiveness. The U.S. Congress in Section 301 expressed particular concern for government plans or schemes to artificially enhance exports.

Second, Korea's acts, policies, and practices are unreasonable because they distort fair, market-oriented competition. By artificially enhancing manufacturing capacity and production in excess of what would result under market conditions, Korea promotes unfair competition for market-oriented firms. These competitive distortions are evidenced by the performance and composition of Korea's manufacturing sector. For example, Korea has an extremely high manufacturing share in GDP (28.3%, nearly triple the U.S. share of 9.9%) and an extremely high goods exports share of GDP (35.9%, more than five times the U.S. share of 7.1%). Korea has maintained a persistent and large bilateral goods trade surplus with the United States, led by automotive, ICT, machinery, and chemical sectors. In particular, Korea exhibits overconcentration of production in memory semiconductors, with just two Korean companies holding over 70% of the global dynamic random-access memory (DRAM) market and 51% of the NAND flash market. Korea's dominance in this sector is evidenced by its ambitious export targets and maintained by its outsized government support, including tax incentives, infrastructure development, and regulatory reforms. For example, under the *K-Semiconductor Belt Strategy*, Korea aims to "consolidate [its] position as the world's No. 1 memory semiconductor" and seeks to double semiconductor exports from $100 billion in 2020 to $200 billion by 2030. The government, in turn, is committed to spend at least $530 billion over two decades and is providing a range of policy support, including to

streamline permitting, expand power and water infrastructure, and provide financial support. Korea's persistent goods trade surplus also contributes to Korea's outsized current account surplus, which is one of the highest among Asian countries, surpassed only by China, Japan and Taiwan in 2025.

Korea also distorts competition by encouraging or failing to address imports and FDI from NMEs. For example, Korean imports of inputs for manufacturing from NMEs, and particularly China, have increased tremendously in recent years. Surging imports of NME inputs both distort competitive conditions within Korea's market and enhances the (artificial) competitiveness of Korean downstream products manufactured using those NME inputs. Further, Korea has largely failed to control FDI from China, which permits China to export its excess capacity and production through Korea's industries. Therefore, Korea's excessive manufacturing capacity, production, and exports, distort and diminish competitive opportunities for market-oriented firms.

Third, Korea's acts, policies, and practices are unreasonable because they enhance Korea's own growth in capacity, production, and exports without commensurately seeking growth in its own demand, consumption, or imports. Korea's industrial plans set manufacturing and export targets and rely on foreign markets to absorb that production. For example, Korea's "123-Policy Framework" (2025-2030) establishes many manufacturing targets and economic benchmarks, such as achieving third-place global standing in AI capabilities; becoming the fifth-largest world economy; expanding semiconductor capacity; and establishing comprehensive AI development infrastructure. To achieve these targets, the government announced a slew of support measures to lower financing costs and to bolster Korea's exports and production in priority sectors. In

contrast, Korea does not appear to have established any targets for domestic consumption or labor compensation, despite its low performance on both indicia. Between 2021-2025, Korea's average share of personal consumption in GDP was nearly 29% below that of the United States. Furthermore, between 2021-2023, Korea's labor share (compensation) of manufacturing GDP was approximately 50% lower than that in the United States, despite Korea's manufacturing success. Korea's low, artificially suppressed wages do not reflect the productivity and competitiveness of its workers, artificially lower costs, and enhance Korea's export sector, at the expense of consumption growth.

Fourth, Korea's acts, policies, and practices are unreasonable because they undermine the welfare of Korea's own workers and public, thereby negatively impacting U.S. workers. For example, despite recording very high levels of manufacturing in GDP, Korea's share of personal consumption and labor compensation in GDP remained persistently below those of the United States. Between 2021-2025, Korea's personal consumption share of GDP averaged 48.5%, compared to the U.S. average of 67.9%. Similarly, between 2021-2023, Korea's labor compensation share of manufacturing GDP was half that of the U.S. share. These data are reflective of Korea's failure to ensure adequate labor conditions for its workers. Specifically, Korea's dual labor market, dependent on low-wage foreign migrant workers, benefits Korean manufacturers by keeping labor costs low. For example, on one hand, unionized workers in conglomerates, like Samsung, have secured significant wage increases after threatening to strike; however, subcontracted workers, often foreign, in labor-intensive, heavy manufacturing have faced criminal and civil penalties for making similar demands. Korea's labor structure and weak protections hurt American workers by exposing them to unfair

competition from Korea. These practices reflect that Korea prioritizes manufacturing, suppresses demand and consumption, and fails to ensure fair labor conditions.

B. Korea's Acts Policies and Practices that Create, Sustain, or Contribute to Structural Excess Capacity and Production Burden or Restrict U.S. Commerce

Korea's acts, policies, and practices that relate to structural excess capacity and production burden or restrict U.S. commerce within the meaning of Section 301(b) by: reducing commercial opportunities for U.S. producers and exporters; harming the U.S. economy through loss of U.S. domestic manufacturing and exports; and increasing U.S. economic security risks, including through reliance on NME inputs.

First, Korea's acts, policies, and practices that relate to structural excess capacity and production burden or restrict U.S. commerce by creating unfair competition and reducing commercial opportunities for U.S. producers and exporters. For example, Korea's average export share of GDP from 2021-2025 was 35.9%, considerably higher than the U.S. average of 7.1%. At an aggregate level, this indicates that these acts, policies, and practices contribute to substantial export success for Korea's firms.

At a product level, the data reveal unfair competition and lost commercial opportunities in the U.S. market, global markets (including Korea), and upstream input markets in Korea. Korea exports to the U.S. market significant amounts of automobiles and automotive parts, computer and printers, semiconductor devices, metals, batteries, and chemicals, which U.S. firms also produce. Korea produces significant amounts of automobiles and automotive parts, computers and printers, semiconductor devices, ferrous metals (iron and steel), batteries, and chemicals, which U.S. firms also produce, and which are sold in global markets (including Korea). Korea also imports significant

amounts of gross fixed capital formation and intermediate input goods, such as electric static converters, ships, communications equipment, semiconductor devices, batteries, chemicals, from NMEs, in particular China, which U.S. firms also produce.

Artificially enhanced production and exports by Korean firms means that U.S. firms lose sales opportunities and revenues in the United States, Korea, and third-country markets, leading to decreased production, declining revenues and profitability, lower investments in capacity or innovation, and lost jobs and lower wages.

Second, Korea's acts, policies, and practices that relate to structural excess capacity and production burden or restrict U.S. commerce by contributing to lost exports and persistent trade surpluses with the United States. Korea has a large, persistent bilateral goods trade surplus with the United States, which increased from $28.5 billion in 2021 to $55.2 billion in 2025, a nearly 94% increase. This surplus is driven by key export sectors that directly or indirectly benefit from Korea's acts, policies, and practices, including automotive, ICT, machinery, and chemicals—industries for which the United States has significant production and exports. Manufacturing share data reflect that firms in Korea have gained or maintained export sales, while U.S. firms have lost export and domestic sales. Korea's manufacturing share of GDP averaged 28.3% between 2021-2025, which is nearly triple, or 180% higher than the U.S. average of 9.9%. Persistent trade deficits for the United States—including a growing deficit with Korea—have contributed to a decline in the U.S. manufacturing sector, and the loss of U.S. manufacturing industries has led to lost manufacturing ecosystems, specialized skills, know-how and future innovation, as well as future growth.

Korea's acts, policies, and practices lead to weak or suppressed domestic consumption as compared to the United States. Korea's share of consumption averaged 48.5% over 2021-2025, which is significantly lower than the U.S. average of 67.9% during the same period. Export opportunities for U.S. firms are also diminished by Korea's low labor share (or compensation) of manufacturing GDP (22.8% average from 2021-2023, or half the U.S. level). These artificially suppressed wages reflect inadequate compensation and diminished purchasing power for Korea's workers, even in successful manufacturing sectors.

Korea's failure to effectively address imports and FDI from NMEs harms the U.S. economy. As noted, Korea's imports of inputs for manufacturing from NMEs, and particularly China, have increased tremendously since 2017, with Korea's imports from China of goods for intermediate consumption increasing by $30 billion, or 49%, between 2017 and 2025, and imports from China of gross fixed capital formation goods increasing by $4 billion, or 25%, over the same period. Surging imports of NME inputs not only distort competitive conditions within Korea's market, but also enhance the (artificial) competitiveness of Korean downstream products manufactured using those NME inputs, both to the detriment of competing U.S. producers and exporters. Failure by Korea to control FDI from China also permits China to export its excess capacity and production through Korea's industries. The result is distorted competitive conditions for U.S. firms, and distorted prices, lost sales or exports, and diminished revenues in Korea and global markets.

Third, Korea's acts, policies, and practices that relate to structural excess capacity and production burden or restrict U.S. commerce by creating economic security risks

from dependence and vulnerabilities for firms and in sectors critical to the functioning of the U.S. economy. Economies with structural excess capacity and production often have highly concentrated production and supply chains in certain sectors or geographic areas. U.S. firms bear undue risks from concentrated supply chains, which results in a loss of supply chain resilience and unseen vulnerabilities from upstream sources of supply. The high concentration of production exacerbates the risk of economic disruption to U.S. firms and domestic producers in the event of an economy-specific shock, and the economic effects of supply chain disruption can reverberate beyond an individual product or sector to other firms in the U.S. economy, potentially reducing their profits and output. Korea's acts, policies, and practices create, sustain, or contribute to structural excess capacity and production in numerous sectors, such as automotive, batteries, chemicals, ICT, and steel. Many of these sectors are critical to the functioning of the U.S. economy, or to U.S. national security. For example, Korea's exports are heavily concentrated in memory semiconductors. Given Korea's dominance in the global memory market, supply chain disruptions impacting Korea could significantly harm U.S. industry and the U.S. economy. Reliance on inputs from China also creates economic security risks. Over 2017-2024, China's value added in Korea's manufacturing exports to the United States ranged between 5.5% and 7.9%. In addition, Korea's imports from China of goods for intermediate consumption increased by $30 billion, or 49%, between 2017 and 2025. By relying more heavily on Chinese inputs, Korea has created vulnerabilities that expose both Korea and the United States to economic security risks of supply chain disruption, and possible coercion. Furthermore, dependence on high levels of Korean manufactured goods impedes investments in U.S. capacity that would diversify supply and enhance

resilience. Excess capacity and production in Korea suppress prices, investment, and production in the United States in sectors that are critical to the functioning of the U.S. economy.

IV. Response to Significant Comments

USTR responds below to significant issues raised concerning the investigation in the public comments and hearings in response to the March 17, 2026, Initiation Notice.

Response to Comments Providing Views on the Methodology Used to Identify Structural Excess Capacity and Production and Framework of the Investigations

Several comments raised concerns regarding USTR's definition of structural excess capacity and production and the possible methodology and evidentiary framework of the investigations. Many of these comments questioned the use of certain indicia, or economic data, to identify structural excess capacity and production. Several comments questioned whether any of the indicia identified in the Initiation Notice could, in isolation, establish structural excess capacity and production. Comments noted that indicia such as low capacity utilization rates and trade surpluses did not always indicate structural excess capacity and production and could be a result of other causes. For example, some comments asserted that low capacity utilization rates may be caused by demand conditions and business cycles and trade surpluses can be a function of saving-investment patterns and comparative advantages. Another comment questioned the use of looking at the contribution of manufacturing as a percentage of U.S. gross domestic product, noting that the downward trend in the United States is consistent among all advanced economies and OECD countries. More broadly, a few comments questioned whether aggregate economic outcomes are prima facie evidence that an economy

maintains acts, policies, and practices that relate to structural excess capacity and production.

Several comments cautioned against the use of a standard capacity utilization rate, noting that the 80% capacity utilization rate cited in the Initiation Notice may not be useful across multiple sectors and multiple economies. One comment noted that an 80% capacity utilization is a reflection of U.S. business cycles and not a normative benchmark for competitive markets. Another comment noted the importance of distinguishing structural excess capacity from normal market cycles, innovation-driven scaling, and shifts in global demand. To ensure normal market behavior is not misidentified as unfair trade, one comment suggested USTR's investigations distinguish between non-market and market economies.

Finally, there were comments suggesting that while it was appropriate to investigate structural excess capacity and production in China's manufacturing sector, where there is ample evidence of structural excess capacity and production, the indicia identified in USTR's Initiation Notice do not provide a reasonable analytical basis for investigating other trading partners, noting that persistent trade surpluses and underutilized or unused capacity are poor gauges for whether excess capacity exists in these economies.

In the Report, USTR has provided a detailed analytical framework to explain the basis for these investigations. This framework includes a review of how structural excess capacity and production have been recognized as trade-distorting phenomena in numerous international fora and evaluated by economists for decades. In the context of these investigations, the Report defines structural excess capacity and production as

capacity or production in an economy that is *persistently in excess* of the amount that would exist under *market-oriented conditions*, and that instead is *created, sustained, or contributed to* by governmental policies or interventions.

USTR agrees that more than one single metric should be evaluated in considering the existence or extent of structural excess capacity and production in a sector or economy. In addition to the indicia included in the Initiation Notice, the Report identifies several additional indicia that are consistent with structural excess capacity and production and uses certain benchmarks to help identify where structural excess and production may exist. The Report notes that the indicia are evaluated in their totality and the analysis is not limited to the listed indicia. In order to distinguish structural excess capacity and production from cyclical excess capacity that arises in the ordinary operation of markets, where appropriate, the Report examines data over longer periods. Importantly, the focus of this investigation is the acts, policies, and practices that relate to structural excess capacity and production. After evaluating the indicia evidencing that structural excess capacity and production may exist, in their totality, USTR considers whether an economy maintains such acts, policies, and practices.

USTR's analysis also distinguishes between different types of economies and markets. Specifically, the Report analyzes acts, policies, and practices within the Korean economy that may create, sustain, or contribute to distortions associated with capacity or production persistently in excess of the amount that would exist under market-oriented conditions. As noted in the Report, such analysis is inherently country-specific, and takes account of the particular political and economic situations presented within an economy's market. Consistent with comments that cautioned against the use of a standard capacity

utilization rate, the Report recognizes that capacity utilization will vary across sectors, but notes that utilization rates that are consistently below peer averages (or historical averages within an economy) may indicate that market mechanisms are not functioning appropriately.

Response to Comments Regarding Actions to be Taken in the Investigations

A number of comments addressed the topic of potential responsive action by the Trade Representative. The vast majority of these comments provided views regarding the inclusion of specific goods from certain investigated economies in any possible action taken. Other comments were general in nature, opposing the application of any tariffs or encouraging the Trade Representative to take a measured and targeted approach to any action. Additionally, comments suggested that any action consider U.S. supply chains for sensitive products and for products that contribute to U.S. manufacturing. Finally, there were comments that suggested alternatives to tariffs, including bilateral engagement with the investigated economies and multilateral engagement with like-minded economies that have recognized overcapacity as a global economic issue.

The Trade Representative proposes that taking an action is appropriate, and that action includes the imposition of additional duties on all products of Korea, with certain exemptions, in order to obtain the elimination of the investigated acts, policies, or practices. The Trade Representative agrees that bilateral engagement is appropriate, and intends to build on constructive bilateral engagement that has already occurred on the topics. However, the Trade Representative will continue to consider these comments in conjunction with any action that might be taken with respect to the investigations.

Response to Comments from the Government of Korea

The Government of Korea states that it maintains a market-based economy and does not contribute to structural excess capacity. Specifically, Korea asserts that U.S.-Korea trade is dominated by high-value-added items (semiconductors, autos, batteries) that are mutually beneficial, and the expanding trade surplus is a result of the deepening integration of U.S.-Korea manufacturing supply chains, not structural excess capacity. Korea also claims that Korean investments reinforce U.S. production capabilities and contribute to revitalization of the U.S. manufacturing sector. Lastly, Korea states it has taken steps to address global excess capacity by supporting domestic restructuring efforts in the petrochemical, steel, and shipbuilding industries and by participating in international fora designed to address excess capacity and production, such as the Global Forum on Steel Excess Capacity.

As discussed below and in the Report, Korea engages in a range of acts, policies, and practices which create, sustain, or contribute to structural excess capacity and production. Korea has implemented industrial and sectoral plans to maintain and expand its manufacturing; provided preferential lending through state-owned banks that target priority sectors; sustained capacity and production despite market conditions; failed to address global excess capacity and production, including by encouraging or failing to address imports from non-market economies; failed to address global excess capacity and production, including by encouraging or failing to address foreign direct investment (FDI) from non-market economies (NMEs); and maintained inadequate labor protections that artificially lower costs.

V. Proposed Actions to Be Taken in the Investigation

Section 301(b) provides that upon determining that the acts, policies, and practices under investigation are actionable and that action is appropriate, the Trade Representative shall take all appropriate and feasible action authorized under Section 301(c), subject to the specific direction, if any, of the President regarding such action, and all other appropriate and feasible action within the power of the President, that the President may direct the Trade Representative to take under Section 301(b), to obtain the elimination of that act, policy, or practice.

Section 301(c) authorizes the Trade Representative to take certain actions for purposes of carrying out the provisions of Section 301(b). Among others, Section 301(c)(1)(B) authorizes the Trade Representative to "impose duties or other import restrictions" on the goods of the foreign country subject to the investigation.

Pursuant to Sections 301(b) and (c), the Trade Representative proposes to determine that action is appropriate and that appropriate action to obtain the elimination of the acts, policies, and practices includes considering to apply tariffs on all goods of Korea of up to 15 percent, net of MFN rates and existing Section 301 tariffs, with exemptions for certain goods identified below.

This proposal accounts for duties applied under other, existing Section 301 actions; duties applied under other, existing Section 232 actions listed below; ongoing consultations with Korea on matters at issue in these investigations; and commitments relevant to certain acts, policies, and practices addressed in the Korea Strategic Trade and

Investment Deal.[2] Alternatively, should the Trade Representative find that ongoing consultations and existing commitments are unsatisfactory, the Trade Representative proposes to consider applying a tariff of up to 25 percent, net of MFN rates and existing Section 301 tariffs, on all products of Korea, with exemptions for certain goods identified below.

The Trade Representative invites comments on the proposed action and the tariff rate to be applied.

The proposed exemptions include: (1) the following articles and parts currently subject to tariffs under Section 232 of the Trade Expansion Act of 1962: articles of aluminum, of steel or of copper or derivative aluminum or steel articles; passenger vehicles (sedans, sport utility vehicles, crossover utility vehicles, minivans and cargo vans) and light trucks; parts of passenger vehicles (sedans, sport utility vehicles, crossover utility vehicles, minivans and cargo vans) and light trucks; medium- and heavy-duty vehicles; parts of medium- and heavy-duty vehicles; wood products; patented pharmaceutical articles; and semiconductor articles; (2) informational materials (*e.g.*, books), donations, and accompanied baggage; (3) other articles enumerated in the Annex to this Notice, which include raw materials that if subject to the proposed additional tariffs could lead to the unavailability of domestic supply; products that if subject to the proposed additional tariffs could cause economy-wide disruptions; certain products that cannot be grown or produced in sufficient quantities in the United States or obtained from other sources; and articles for which additional tariffs, in the Trade Representative's

assessment, may not contribute substantially to the elimination of the investigated acts, policies, and practices described above; and (4) certain agglomerated iron ores and concentrates.

VI. Request for Public Comments

In accordance with Section 304(b) (19 U.S.C. 2414(b)), USTR invites comments from interested persons with respect to the proposed actions to be taken in the investigations. To be assured of consideration, you must submit written comments on the proposed actions by January 5, 2027, in accordance with the instructions in section VIII below.

With respect to the proposed action, USTR invites comments regarding:

- The specific products to be subject to increased duties, including whether products should be retained or removed from the scope of the proposed action;
- The rate of duty to apply to any or all products of Korea, and whether adjustments to the tariff rate applied should be made to account for duties applied to certain goods of Korea under other, existing Section 301 actions; duties applied to certain goods of Korea under other, existing Section 232 actions; and commitments the tariff rate announced as part of the Korea Strategic Trade and Investment Deal.[3]
- The extent to which the Korea Strategic Trade and Investment Deal addresses issues raised in this investigation.
- Whether negotiations of a plurilateral agreement to address the issues raised in the sixteen Section 301 investigations of acts, policies, and practices related to structural

excess capacity and production should be explored to address global challenges created by structural excess capacity and production and the provisions that any such agreement should contain to combat this phenomenon.

In considering whether certain articles should be subject to additional duties under Section 301, USTR will consider the needs of the U.S. economy. In commenting on the inclusion or removal of particular tariff subheadings subject to the proposed action, USTR requests that comments address specifically whether the products under the tariff subheading are necessary raw materials that if subject to the proposed additional tariffs could lead to the unavailability of domestic supply; whether additional tariffs would cause serious dislocations in the supply of the products and could cause economy-wide disruptions, or other similar factors; and whether imposing additional tariffs on products under the tariff subheading would be practicable or effective in obtaining the elimination of the investigated acts, policies, and practices.

Additional instructions on how to submit written comments are provided in section VIII below.

VII. Hearing Participation

The Section 301 Committee will convene public hearings beginning on January 25, 2027, in the main hearing room of the U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, beginning at 10:00 a.m. The hearings may continue, as appropriate. To testify at the hearings, you must submit a request to appear using the electronic portal at https:// comments.ustr.gov/s/, following the instructions in Part VIII below.

Requests to appear must include a summary of testimony, and may be accompanied by a pre-hearing submission. USTR will announce details of the hearing at a later time. All submissions must be in English. To be assured of consideration, USTR must receive your request to appear and summary of the testimony by January 5, 2027.

VIII. Procedures for Written Comments

You must submit requests to appear at the hearings or written comments using the appropriate docket on the portal at https://comments.ustr.gov/s/. All submissions must be in English.

Interested persons wishing to provide testimony at the hearing must submit a notification of intent and summary of testimony using the docket entitled "Request to Appear at the Hearing on Proposed Action in the Section 301 Investigation of Acts, Policies, and Practices of Korea Relating to Structural Excess Capacity and Production in Manufacturing Sectors," docket number USTR–2026–0741.

To submit written comments, including rebuttal comments, use the docket on the portal entitled "Request for Comments Concerning Proposed Action in Section 301 Investigation of Korea Relating to Structural Excess Capacity and Production in Manufacturing Sectors," docket number USTR–2026–0734.

You do not need to establish an account to submit comments. The first screen of each docket allows you to enter identification and contact information. Third party organizations such as law firms, trade associations, or customs brokers, should identify the full legal name of the organization they represent, and identify the primary point of contact for the submission. Information fields are optional; however, your comment or request may not be considered if insufficient information is provided.

Fields with a gray Business Confidential Information (BCI) notation are for BCI information which will not be made publicly available. Fields with a green (Public) notation will be viewable by the public.

After entering the identification and contact information, you can complete the remainder of the comment, or any portion of it by clicking "Next." You may upload documents at the end of the form and indicate whether USTR should treat the documents as business confidential or public information.

Any page containing BCI must be clearly marked 'BUSINESS CONFIDENTIAL' on the top of that page and the submission should clearly indicate, via brackets, highlighting, or other means, the specific information that is BCI. If you request business confidential treatment, you must certify in writing that disclosure of the information would endanger trade secrets or profitability, and that the information would not customarily be released to the public.

Parties uploading attachments containing BCI also must submit a public version of their comments. If these procedures are not sufficient to protect BCI or otherwise protect business interests, please contact the USTR Section 301 support line at (202) 395-5725 to discuss whether alternative arrangements are possible.

USTR will post attachments uploaded to the docket for public inspection, except for properly designated BCI. You can view submissions on USTR's electronic portal at https://comments.ustr.gov/s/.

ANNEX

Note: All products that are properly classified in the provisions of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are not covered by the proposed action,r except as provided in the "Scope Limitations" column. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included". Any questions regarding the scope of particular HTSUS provisions should be referred to U.S. Customs and Border Protection.

Notes on certain HTSUS provisions for which only a portion of the provision is covered in this Annex, as provided in the "Scope Limitations" column:

- A subheading marked with "**Ex**" is defined and limited by the product description.

- A subheading marked with "**Aircraft**" includes only articles of civil aircraft (all aircraft other than military aircraft); their engines, parts, and components; their other parts, components, and subassemblies; and ground flight simulators and their parts and components, that otherwise meet the criteria of general note 6 of the HTSUS, regardless of whether a product is entered under a provision for which the rate of duty "Free (C)" appears in the "Special" sub-column.

- A subheading marked with "**Pharma**" includes only articles that are for use in pharmaceutical applications, regardless of whether a product is entered under a provision for which the rate of duty "Free (K)" appears in the "Special" sub-column.

7202.30.00	Ferrosilicon manganese	
7202.41.00	Ferrochromium containing by weight more than 4 percent of carbon	
7202.49.10	Ferrochromium containing by weight more than 3 percent but not more than 4 percent of carbon	
7202.49.50	Ferrochromium containing by weight 3 percent or less of carbon	
7202.50.00	Ferrosilicon chromium	
7202.60.00	Ferronickel	
7202.80.00	Ferrotungsten and ferrosilicon tungsten	
7202.91.00	Ferrotitanium and ferrosilicon titanium	
7202.93.40	Ferroniobium containing by weight less than 0.02 percent of phosphorus or sulfur or less than 0.4 percent of silicon	
7202.93.80	Ferroniobium, nesoi	
7203.10.00	Ferrous products obtained by direct reduction of iron ore	
7203.90.00	Spongy ferrous products, in lumps, pellets or like forms; iron of a minimum purity by weight of 99.94% in lumps, pellets or like forms	
7204.10.00	Cast iron waste and scrap	
7204.21.00	Stainless steel waste and scrap	
7204.29.00	Alloy steel (o/than stainless) waste and scrap	
7204.30.00	Tinned iron or steel waste and scrap	
7204.41.00	Ferrous turnings, shavings, chips, milling wastes, sawdust, fillings, trimmings and stampings, whether or not in bundles	
7204.49.00	Ferrous waste and scrap nesoi	
7204.50.00	Iron or steel remelting scrap ingots	
7304.31.30	Iron (other than cast) or nonalloy steel, seamless, cold-drawn or cold-rolled, hollow bars with circular cross section	Aircraft
7304.31.60	Iron (other than cast) or nonalloy steel, seamless, cold-drawn or cold-rolled, tubes, pipes and hollow profiles, with circular cross section, nesoi	Aircraft
7304.39.00	Iron (other than cast) or nonalloy steel, seamless, not cold-drawn or cold-rolled, tubes, pipes and hollow profiles, with circular cross section, nesoi	Aircraft
7304.41.30	Stainless steel, seamless, cold-drawn or cold-rolled, tubes, pipes and hollow profiles, with circular cross section and external diameter of less than 19mm	Aircraft

8415.90.80	Parts for air conditioning machines, nesoi	Aircraft
8418.10.00	Combined refrigerator-freezers, fitted with separate external doors, electric or other	Aircraft
8418.30.00	Freezers of the chest type, not exceeding 800 liters capacity, electric or other	Aircraft
8418.40.00	Freezers of the upright type, not exceeding 900 liters capacity, electric or other	Aircraft
8418.61.01	Heat pumps, other than the air-conditioning machines of heading 8415	Aircraft
8418.69.01	Refrigerating or freezing equipment nesoi	Aircraft
8419.50.10	Brazed aluminum plate-fin heat exchangers	Aircraft
8419.50.50	Heat exchange units, nesoi	Aircraft
8419.81.50	Cooking stoves, ranges and ovens, other than microwave, for making hot drinks or for cooking or heating food, not used for domestic purposes	Aircraft
8419.81.90	Machinery and equipment nesoi, for making hot drinks or for cooking or heating food, not used for domestic purposes	Aircraft
8419.90.10	Parts of instantaneous or storage water heaters	Aircraft
8419.90.20	Parts of machinery and plant, for making paper pulp, paper or paperboard	Aircraft
8419.90.30	Parts of heat exchange units	Aircraft
8419.90.50	Parts of molten-salt-cooled acrylic acid reactors, nesoi; parts of certain medical, surgical or laboratory sterilizers, nesoi	Aircraft
8419.90.85	Parts of electromechanical tools for work in the hand, with self-contained electric motor, for treatment of materials by change in temperature	Aircraft
8421.19.00	Centrifuges, other than cream separators or clothes dryers	Aircraft

8421.21.00	Machinery and apparatus for filtering or purifying water	Aircraft
8421.23.00	Oil or fuel filters for internal combustion engines	Aircraft
8421.29.00	Filtering or purifying machinery and apparatus for liquids, nesoi	Aircraft
8421.31.00	Intake air filters for internal combustion engines	Aircraft
8421.32.00	Catalytic converters; particulate filters for internal combustion engines	Aircraft
8421.39.01	Filtering or purifying machinery and apparatus for gases, other than intake air filters or catalytic converters, for internal combustion engines	Aircraft
8424.10.00	Fire extinguishers, whether or not charged	Aircraft
8425.11.00	Pulley tackle and hoists other than skip hoists or hoists used for raising vehicles, powered by electric motor	Aircraft
8425.19.00	Pulley tackle and hoists other than skip hoists or hoists used for raising vehicles, not powered by electric motor	Aircraft
8425.31.01	Winches nesoi, and capstans, powered by electric motor	Aircraft
8425.39.01	Winches nesoi, and capstans, not powered by electric motor	Aircraft
8425.42.00	Hydraulic jacks and hoists, nesoi	Aircraft
8425.49.00	Jacks and hoists of a kind used for raising vehicles, other than hydraulic, nesoi	Aircraft
8426.99.00	Derricks, cranes and other lifting machinery nesoi	Aircraft
8428.10.00	Passenger or freight elevators other than continuous action; skip hoists	Aircraft
8428.20.00	Pneumatic elevators and conveyors	Aircraft
8428.33.00	Belt type continuous-action elevators and conveyors, for goods or materials	Aircraft
8428.39.00	Continuous-action elevators and conveyors, for goods or materials, nesoi	Aircraft
8428.90.03	Machinery for lifting, handling, loading or unloading, nesoi	Aircraft
8443.31.00	Multifunction units (machines which perform two or more of the functions of printing, copying or facsimile transmission, capable of connecting to an automatic data processing machine or to a network)	Aircraft

8471.70.50	Automatic data processing magnetic disk drive storage units, disk diameter not exceeding 21 cm, nesoi, not entered with the rest of a system	
8471.70.60	Automatic data processing storage units other than magnetic disk, not assembled in cabinets for placing on a table etc., not entered with the rest of a system	
8471.70.90	Automatic data processing storage units other than magnetic disk drive units, nesoi, not entered with the rest of a system	
8471.80.10	Control or adapter units for automatic data processing machines not entered with rest of a system	
8471.80.40	Unit suitable for physical incorporation into automatic data processing machine or unit thereof, not entered with the rest of a system, nesoi	
8471.80.90	Other units of automatic data processing machines, not entered with the rest of a system, nesoi	
8471.90.00	Magnetic or optical readers, nesoi; machines for transcribing data on data media in coded form and machines for processing such data, nesoi	
8473.30.11	Printed circuit assemblies, not incorporating a cathode ray tube, of the machines of 8471	
8473.30.20	Parts and accessories of the automatic data processing machines of heading 8471, not incorporating a CRT, parts and accessories of printed circuit assemblies	
8473.30.51	Parts and accessories of the automatic data processing machines of heading 8471, not incorporating a CRT, nesoi	
8473.30.91	Parts and accessories of the automatic data processing machines of heading 8471, incorporating a CRT, nesoi	
8479.89.10	Air humidifiers or dehumidifiers with self-contained electric motor, other than for domestic purposes	Aircraft
8479.89.20	Floor polishers with self-contained electric motor, other than for domestic purposes	Aircraft
8479.89.65	Electromechanical appliances with self-contained electric motor, nesoi	Aircraft

8529.90.49	Combinations of parts of television receivers specified in U.S. note 10 to chapter 85 of the HTSUS, other than printed circuit assemblies, nesoi	Aircraft
8529.90.55	Flat panel screen assemblies for TV reception apparatus, color video monitors and video projectors	Aircraft
8529.90.63	Parts of printed circuit assemblies (including face plates and lock latches) for television cameras	Aircraft
8529.90.68	Parts of printed circuit assemblies (including face plates and lock latches) for television apparatus other than television cameras	Aircraft
8529.90.73	Parts of printed circuit assemblies (including face plates and lock latches) for radar, radio navigational aid or radio remote control app.	Aircraft
8529.90.77	Parts of printed circuit assemblies (including face plates and lock latches) for other apparatus of headings 8524 to 8528, nesoi	Aircraft
8529.90.78	Mounted lenses for use in closed circuit television cameras, separately imported, with or without attached electrical connectors or motors	Aircraft
8529.90.81	Other parts of television cameras, nesoi	Aircraft
8529.90.83	Other parts of television apparatus (other than television cameras), nesoi	Aircraft
8529.90.87	Parts suitable for use solely or principally with the apparatus of 8525 and 8527 (except television apparatus or cellular phones), nesoi	Aircraft
8529.90.88	Subassemblies with 2 or more printed circuit boards or ceramic substrates, except tuners or convergence assemblies, for color TV, entered with components in additional U.S. note 4 to chapter 85 of the HTSUS	Aircraft
8529.90.89	Subassemblies with 2 or more printed circuit boards or ceramic substrates, except tuners or convergence assemblies, for color TV, other	Aircraft
8529.90.93	Parts of television apparatus, nesoi	Aircraft
8529.90.95	Assemblies and subassemblies of radar, radio navigational aid or remote control apparatus, of 2 or more parts joined together, nesoi	Aircraft

8543.70.60	Electrical machines and apparatus nesoi, designed for connection to telegraphic or telephonic apparatus, instruments or networks	Aircraft
8543.70.80	Microwave amplifiers	Aircraft
8543.70.91	Digital signal processing apparatus capable of connecting to a wired or wireless network for sound mixing	Aircraft
8543.70.95	Touch screens without display capabilities for incorporation in apparatus having a display	Aircraft
8543.90.12	Parts of physical vapor deposition apparatus of subheading 8543.70	Aircraft
8543.90.15	Assemblies and subassemblies for flight data recorders, consisting of 2 or more parts pieces fastened together, printed circuit assemblies	Aircraft
8543.90.35	Assemblies and subassemblies for flight data recorders, consisting of 2 or more parts pieces fastened together, not printed circuit assemblies	Aircraft
8543.90.65	Printed circuit assemblies of flat panel displays other than for reception apparatus for television of heading 8528, except for subheadings 8528.52 and 8528.62	Aircraft
8543.90.68	Printed circuit assemblies of electrical machines and apparatus, having individual functions, nesoi	Aircraft
8543.90.85	Parts, nesoi, of flat panel displays other than for reception apparatus for television of heading 8528, except for subheadings 8528.52 and 8528.62	Aircraft
8543.90.88	Parts (other than printed circuit assemblies) of electrical machines and apparatus, having individual functions, nesoi	Aircraft
8544.30.00	Insulated ignition wiring sets and other wiring sets of a kind used in vehicles, aircraft or ships	Aircraft
8549.13.00	Waste/scrap of batteries/accumulators; spent batteries/accumulators (o/t lead-acid), sorted and not containing lead/cadmium/mercury	
8801.00.00	Balloons, dirigibles and non-powered aircraft, gliders and hang gliders	Aircraft
8802.11.01	Helicopters (except unmanned aircraft of heading 8806), with an unladen weight not over 2,000 kg	Aircraft
